Backend : [Python](#)

Databases :

Framework :

IDE : [Visual Studio Code](#) , [PyCharm](#) , [Spyder](#) , [Replit](#)

Operating System: [Windows](#) , [Linux](#)

Hands-on Projects

Dynamic Todos Application

Developed custom Todos List application where users can Add and Remove their Tasks and can mark as completed too.

- To create a simple Javascript to-do list. Looking to do a web application without the help of server-side scripts? This is a pure Javascript to-do list that uses the local storage API, no PHP, and no database required.
- Whatever we want to do a task and add as well as we can remove and strike through when we complete the task this is the advantage of this application.

Technologies used: HTML, CSS, JavaScript,Python

Dynamic Movie Review WebSite

Developed responsive Movie Review application which shows all Movies and respective Content in the Script if we add previous.

- A movie review is a detailed analysis of a film or a documentary. It involves analysis, research, and reporting the writer's views in a structured way. The writer assumes a position of educating readers whether they have watched the film or not.
- Implemented local search functionality by using input element, JavaScript event listeners & filtered Movies using the Array filter method.

Technologies used: HTML, CSS, JS, Bootstrap
